Focus Finish & Rewind Systems
ADVANCED TECHNOLOGY PLATFORM

# Focus Finish & **Rewind Systems**

ADVANCED TECHNOLOGY PLATFORM

Printing & Converting today requires the ability & confidence to serve a wide range of markets. High productivity, cost-efficient operation and versatility while maintaining key elements of quality are essential.

The perfect complement to all Print shops is an Inspection & rewinding solution to streamline your production through improved performance. We provide the convenience & choice of free standing or tabletop models. The RT & FS Inspection rewind platforms have all the features you expect to find matched by the quality of a Focus product. Scissor/Crush Slitting, Multi directional rewinding, Web guide, single or double rewind turrets, preset ramp up & down, positive web drive, monitored tension control.

- > New intuitive operator interface
- > Pre-Set Tension parameters for flexibility of substrates
- > Fully Programmable label & length counters
- > Inside /outside rewinding
- > Fast Job Changes
- > High productivity & Less Waste
- > Wide range of accessories & Options
