Link Label Machinery

Stand: 4C30

Link Label will launch the new **Link 330 H digital label finishing line**. The outstanding design allows customer customized combinations of semirotary units with flat bed units as semirotary and flat bed hot foil stamping combined with embossing, flat bed screen printing, semirotary flexo, offset and front or reverse letterpress printing as well as semirotary and flat bed die cutting. The exhibition machine has a unique servo drive concept, unwinder, 1 semirotary hot foil unit, 1 semirotary offset printing unit, 1 flat bed screen printing unit, 1 flatbed hot foil stamping unit with electronically controlled stroke and plate residence time and lateral or longitudinal twistable foil feeding, 1 semirotary die cutting unit with the "Micro Link" high precision setting and a rewinder. Furthermore the full servo driven **Link 350 semirotary offset** label printing machine will be presented. Each printing unit has 8 servo motors operating automatic processes. As a novelty Link Label offers this machine extended to a complete in-line hybrid printing and converting system where all the semirotary and flat bed units used for the 330 H digital finishing line can be integrated. Also the high performance sheeter **ISH 330** will be demonstrated.

LINK Finishing

featured with a flat bed screen printing unit, 2 hot foil stamping units and a flat bed die cut unit
