

LINK H 330 TC

compact Hot Foil Stamping Machine with turnable foil feeding head

Link H 330 TC Hot Foil Stamping Machine

independent stand-alone-machine for labels on roll refining with hot foil stamping or - as an option - hot foil stamping and embossing in one run. For efficient use the foil feeding unit can be easily turned and positioned appropriate to the job lengthwise or crosswise to the web. The web width 330 mm is determined to match digital printing systems.

Features

- ▶ unwind with air shaft
pneumatic brake for tension control
- ▶ Stand-Alone-Module with infeed and outfeed system
second pass scanner
web tension control setting
servo drive
- ▶ flat bed hot foil stamping unit with electric heating system
turnable foil feeding head
two path foil feeding
foil saver system
7" touch screen mounted on movable arm
- ▶ rewind with air shaft

Options

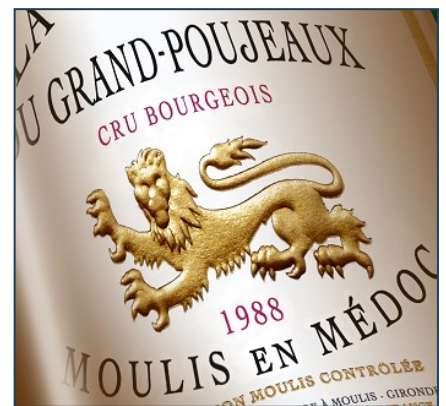

- ▶ remote support
- ▶ digital pressure control system
- ▶ hologramm register control system
- ▶ embossing chassis
- ▶ foil unwind friction shafts
