

digi L 320

servo controlled finishing system with flat bed die cut

Technical Data:

Web width	320 mm
Unwind roll	max. 500 mm Ø
die cut area	310 x 310 mm
die cut tool	steel rule die 2 - 23 mm thick (to be defined in advance)
Speed	250 imp/min

Features

- ▶ Servo control
- ▶ Stroke electronically controlled and servo driven
- ▶ Impression electronically controlled
- ▶ Infeed electronically controlled and servo driven with web tension control
- ▶ Register-control with sensor for die cut in register
- ▶ fast set up
- ▶ easy operation with HMI touchscreen
- ▶ Job saving
- ▶ loop controlled rewind with two pneumatic shafts

Options

- ▶ Sheeter
- ▶ Lamination unit for self adhesive laminate with or without silicone liner
- ▶ Extension with Hot Foil Stamping Unit
- ▶ Extension with Punching Unit (picture left)
- ▶ Selection of rewinds with different performance features
- ▶ In-Line processing with different printing units e.g. screen printing
