

GL 280/330

Lesko GL „Green Line” machine is a new product targeted to customers for whom the price of the device is a key issue. The functionality of this machine in the production of labels has not been limited in any way compared to machines of the RLS/RLS DIE series. Machine can be equipped with none, 1 or 2 die cutting units driven by main motor (blank labels) or servo drive. The ergonomic design of the device allows comfortable work. The machine is microprocessor controlled. The intuitive interface is combined with 7-inch touch screen.

Lesko
ENGINEERING™
Power of Flexibility

web widths: 280/330 mm
max. unwind dia.: 750 mm
max. rewind dia.: up to 600 mm
max. speed: 220 m/min
type of slitting unit: Shear cutting / razor blades / crush cutting knives
type of rewinder: Single shaft / double shaft / semi turret rewinder

CL 280 APLI

Lesko CL280 is a compact size, efficient rewinder prepared for the installation of labels application head. Thanks to the servo drive and encoder installed in the machine, there is a possibility to combine the rewinder with application head easily. Machine is equipped with big application table, color panel with touch screen and single shaft servo driven rewinder.

web widths: 280 mm
max. unwind dia.: 750 mm
